EXECUTIVE SUMMARY

1. NEEDS STATEMENT

South End Shelburne residents have experienced contaminated well water and water shortages due to drought. A community well and public drinking water supply in the neighbourhood will address the determined need of property owners and improve health outcomes and quality of life for all residents.

2. OBJECTIVE

Development of a community well located at the **Roger Grovestine Recreation Complex (RGRC)** in the South End of Shelburne in partnership with the Town of Shelburne. Support for a community well has been well documented with a petition circulated by SEED being signed by over 150 local residents (Appendix III) as well as an online petition signed by more than 2700 supporters (Appendix III).

3. GOALS

A community well installed with funding provided by SEED partners and maintained in collaboration with the Town of Shelburne to provide a public drinking water supply and meet the demonstrated needs raised by community residents including:

- a. documented cases of private wells as well as the former public water supply at RGRC contaminated with E.Coli and/or Total Coliform bacteria
- b. increasing seasonal drought resulting in dry or contaminated wells and need for distribution of water by the Town of Shelburne
- c. requirement for education about well maintenance for residents with private wells as recommended in Residential Water Review Staff report to council October 15, 2018

- d. ongoing concerns of environmental racism and potential health impacts raised beginning in the early 1990s by African Nova Scotian residents located adjacent to the “town dump” and the lack of an environmental assessment or remediation plan including a ‘monitoring well program’ in order to determine potential leachate and possible impact on residents
- e. an opportunity to improve the RGRC, an underdeveloped town asset located in the community as an additional location for distribution of clean water
- f. address systemic racism and traditional lack of public infrastructure or government support for economic development in African Nova Scotian neighbourhoods with an inclusive project that can create ongoing opportunities for community development and education
- g. improve health outcomes and quality of life for all residents
- h. align with strategic outcomes from the 2017-2021 Town of Shelburne Strategic Plan and 2014 Town of Shelburne Municipal Climate Change Action Plan Strategy 5 to Protect Future Drinking Water Supply

4. SOLUTION

In addition to our proposal and determination of both need and community support for a community well in the form of petitions as required by council and the Local Improvement By-Law, Section 10(a), **SEED has also secured funding for the installation of the community well from private partners** and a quote from a qualified contractor (APPENDIX II), reducing the investment and financial risk associated with developing community well infrastructure for the Town of Shelburne.

5. SWOT ANALYSIS

a. STRENGTHS

- ✓ Proven need for improved water supply and water security for all Shelburne residents

- ✓ Determined need based on water quality tests and public demand for a community well located in the South End of Shelburne
- ✓ Documented community and public support
- ✓ Strong leadership by SEED and Louise Deslile built national awareness
- ✓ Suitable town owned facility at Roger Grovestine Recreation Complex
- ✓ Secured financing and public-private sector partnerships
- ✓ Meets multiple objectives in Town of Shelburne Strategic Plan
- ✓ Community led initiative
- ✓ Will improve health outcomes and quality of life for all residents

b. WEAKNESSES

- ✓ Requires support and partnership with Town of Shelburne
- ✓ Ongoing maintenance costs and monitoring of public water utility
- ✓ Underdeveloped and under serviced neighbourhood
- ✓ Systemic racism and bias
- ✓ RGRC may require facility upgrades and updates
- ✓ Communication between municipality and residents

c. OPPORTUNITIES

- ✓ Create public drinking water supply to address water quality and security
- ✓ Strengthen relationships and goodwill between African Nova Scotian community locally and provincially and the Town of Shelburne
- ✓ Community and economic development
- ✓ Utilize local and national press attention on water quality concerns in Shelburne to promote community well project
- ✓ Ongoing costs of maintenance for the public water utility could be offset with development of a canteen on site, a fee for sport teams and groups that use the complex recreationally to access the community well, and/or charges for seasonal visitors to the town to access the well
- ✓ Potential provincial or federal government partnership

d. THREATS

- ✓ Lack of federal or provincial government partnership
- ✓ Public frustration with lack of action on water quality in South End Shelburne
- ✓ Potential overuse or underuse of community well
- ✓ Drought independent or drought related conditions that could contaminate or compromise water quality or quantity

6. STRATEGIC OUTCOMES

This proposal meets targeted objectives and recommendations from Shelburne Town Council's vision as articulated in the 2017-2021 Town of Shelburne strategic plan of ***“moving forward together toward a prosperous and sustainable future”*** in the following ways:

- a. **Strategic Plan Goal #2: Grow Community** (strengthening community, contributing to neighbourhoods) to “Invest in parks, trails, green spaces and recreational opportunities in all areas of Town” as well as “Continued implementation of MCAP plan focusing on stormwater, drought, etc.”
- b. **Strategic Plan Goal #3: Grow Partnerships** (working through community and strengthening existing cooperation) including **Objective 3.1** to “Invest in community recreational and cultural infrastructure, expand partnerships with community groups” and **Objective 3.3** of “partnering with community groups and organizations to access additional funding opportunities” and particularly to **“Establish partnerships with the private sector to promote investment in community infrastructure”**.
- c. **Strategic Plan Goal #4: Grow Capacity, Objective 4.1** “Investing in town infrastructure” specifically the objective to **“develop a strategy to expand access to water services to additional areas”**

The creation of a community well at the RGRC will also meet the following strategic outcomes identified as priorities by the Town of Shelburne:

- d. **2014 Town of Shelburne Municipal Climate Change Action Plan Strategy 5: Project Future Drinking Water Supply** by improving a former public drinking water supply to provide potable water in a recreation facility.
- e. **Residential Water Review Staff report to council October 15, 2018** **recommendations** to educate residents on care and maintenance of private wells, reduce drought independent contamination conditions, and provide an alternate potable water source for water distribution during drought related conditions.
- f. Implement feedback from community residents from 2018 Town of Shelburne public survey on future use of the Roger Grovestine Memorial Recreation Complex which received 62 resident responses including **“improvements to the washroom and canteen facilities”**.

ROGER GROVESTINE

LOCATION

7. FACILITY OVERVIEW

Located within the South End neighbourhood of Shelburne the Roger Grovestine Memorial Recreation Complex is a municipal asset of the Town of Shelburne, located on Carleton Street consisting of three tennis courts, baseball field, benching, bleachers, storage shed, washrooms, and canteen. The complex was registered as a public drinking water supply with Nova Scotia Environment on July 22, 2010 (APPENDIX II) but a Boil Water Advisory was issued in April 2011 due to presence of Total Coliform in drinking water and the facility deregistered as a public drinking water supply in September of 2011. **The need to upgrade the facility and improve water quality, along with requirements for ongoing water testing in order to reregister and qualify as a public drinking water supply makes this facility an ideal location for a community well.**

8. LAND SUITABILITY

Developing and improving the Roger Grovestine Memorial Recreation Complex has been explored by the Town of Shelburne for many years including public workshops in May and November of 2017 and a survey and public workshop in 2018. According to a Yarmouth County Vanguard article dated June 11, 2018 the complex is under-utilized as **"less than half of 14-acre town owned property is used"** according to the same article **"improvements to the washroom and canteen facilities were among the suggestions put forth by residents in the survey"**.

Locating the community well at an existing town asset that is in need of additional infrastructure within the South End of Shelburne is a benefit to all residents and visitors, the location already has parking and is accessible to the public. Additionally installation of a drilled well at the recreation complex location could be used to develop further infrastructure and recreational opportunities currently limited by the lack of potable water on site.

8. EXISTING INFRASTRUCTURE

Existing infrastructure at the complex includes a washroom with a well, pump, and pressure tank. According to the **Shelburne Infrastructure Study completed by CBCL Limited for the Town of Shelburne in 2015** two dug wells are on-site and provide non-potable water for the washroom facilities. "All mechanical systems are in fair condition and appear to be adequate for their present use."

WATER ADVISORY REPORT

Boil Advisory

April 29, 2011

RECEIVED
MAY 04 2011

Gerald Locke
TOWN OF SHELBURNE
P O BOX 670
SHELBURNE, NS B0T 1W0

Re: **BOIL WATER ADVISORY - ISSUED**, Water Supply # 2010-073339, Roger Grovstine Recr

Please be advised that the water supply servicing the above noted facility is considered **not fit for consumption** and a boil advisory has been issued. It is your responsibility to ensure that the water is boiled or an alternate supply of potable water is utilized until satisfactory bacteriological water quality is restored.

Please ensure all employees and patrons are informed of the water restrictions and that all taps available to employees and patrons are properly posted for notification purposes. Suggested wording for tap posting or notification may include:

"Due to water quality problems and the possibility of unsafe water, consumers are advised to boil water for at least one minute before drinking, preparing infant formulas, preparing juices and ice cubes, washing fruits and vegetables, cooking, dental hygiene or any other activity requiring human consumption."

Please be advised that the facility will remain under a boil advisory until such time that:

- two consecutive water samples, taken a minimum of 24 hours apart and in the absence of free chlorine residual, have been found to be free from total coliform and *E. coli*;
- the deficiencies which led to the boil water advisory are corrected.

The sample results must be submitted to this office for review and confirmation. Please note that the boil advisory is not to be removed unless under the direction of *Nova Scotia Environment (NSE)*.

Please refer to the **Guidelines for Monitoring Public Drinking Water Supplies** for any additional information (<http://www.gov.ns.ca/enla/water/publicwater.asp>).

July 22, 2010

Dear Mr. Locke:

RE: Water Supply Registration - Registration No. 2010-073339
Roger Grovestine Recreation Complex , 2 Carleton St, Shelburne
PID # 80149461

You are now registered with Nova Scotia Environment as an owner of a public drinking water supply system and your responsibilities as a provider of water to the public are summarized below.

Your registration number is 2010-073339. Please ensure this number is recorded on all drinking water samples and is referred to in any correspondence with our Department.

As the owner of a registered public drinking water supply, you must meet the requirements of the *Water and Wastewater Facilities and Public Drinking Water Supplies Regulations* and the guidelines referenced therein. A copy of the appropriate section of the regulation is attached for your information.

As the owner of a registered public drinking water supply, you are required to sample the supply for coliform bacteria a minimum of four (4) times a year at the tap. The designated months you are required to sample are Prior To Opening, Then Every 3 Months Till Closing. The water sample should be submitted within 24 hours to a laboratory for analysis. Please see the attached list for approved labs.

The lab will return the analysis results to you, and you are required to retain them as a record of your water supply quality. A representative of the Department may ask to view your lab results to ensure you are in compliance with the requirements of the regulations.

If the lab detects a contaminant in your water supply which exceeds acceptable levels, you are required to advise Nova Scotia Environment. Upon confirmation of an unacceptable result, a follow-up inspection will be conducted.

If you have any questions, please call Anthony Shand at 902-742-8985.

Yours truly,

Anthony Shand
Inspector Specialist

Support a community well in the South End of Shelburne

SEED started this petition to Residents of Shelburne County

Over the past few years Shelburne County has been experiencing droughts resulting in many people not having access to clean, safe drinking water. As our weather changes this will only get worse.

Through the work of SEED, filmmaker, actor and activist, Ellen Page has generously offered to provide funds for a community well to be located in the South End of Shelburne. The well will be accessible to all residents of Shelburne County.

One of the stipulations of the Town of Shelburne before they will consider the offer, is an assurance that this well will be used. We need the residents of Shelburne County to show their support for a Community Well by spreading the word, signing this petition and talking to their Town Councillors.

Please indicate in the “comments” how many people in your household would use the Community Well. Thank you for your support.

contact information for town council:

Karen Mattatall - mayor@town.shelburne.ns.ca

Deputy Mayor Ringer - councillornger@town.shelburne.ns.ca

Councillor Davis at councillordavis@town.shelburne.ns.ca or at 902-875-6858

Councillor Locke - councillorlocke@town.shelburne.ns.ca

Councillor Young - councilloryoung@town.shelburne.ns.ca

2,810 have signed. Let's get to 5,000!

Full petition and signatures available here:

change.org/p/residents-of-shelburne-county-support-a-community-well-in-the-south-end-of-shelburne

Family had been directly affected by the water issue here for years, it's time to step up and take care of what needs to be addressed.

Cindy Dean

Supporting my old community which has traditionally been disenfranchised.

Graham Nickerson

Because i was a resident of Shelburne, and now reside in Halifax. But my family, relatives and others still reside there. So yes, good drinking water is a must when in need. You cannot survive without.

Linda Wesley

Before I moved to Halifax, I struggled with water shortages at my family home. Now that I've moved, I still see it happening to my family/relatives/friends. This would definitely be a great resource!

Oshia MacKay

I have lived in Shelburne. I now have lupus, 7 other autoimmune diseases, and had 2 different cancers. My rheumatologist strongly believes that the direct cause of my lupus is due to the contaminated ground water from the toxins leached from the town dump. My grandparents have cancer. My uncle died in his 30's from stomach cancer. I almost lost my mother to multiple myeloma. Please! Change is needed so lives can be saved!

Dana Villeneuve

Centre of town doesn't need this well, it belongs in the South end. The South end is the part of town that has been forgotten and screwed over for years. They don't have access to clean water unlike the rest of Shelburne.

Tara Acker

It is a human right to have clean water to drink and sustain our lives where we live. It is time for all people to come together and support Black and Indigenous and poor people who are fighting for the basic human right to clean water and freedom from pollution, disease and death due to human activity and industry that is destroying our water. Water is Sacred. Water is Life. All living beings need clean water to survive.

Wela'lin

Dorene Bernard

Petition to Support the Building of a Well

Petition summary and background

Over the past few years Shelburne County has been experiencing summer droughts that have meant that many people do not have access to clean, safe drinking water. Activist Ellen Page has generously offered to provide funds for a community well to be located in the South End that will be accessible to all residents of Shelburne County. One of the stipulations of the Town of Shelburne to community group SEED, before they will consider the offer, is an assurance that this well would be used.

Action petitioned

I, the undersigned, am fully in support of having the well built in the South End and I am certain that I and others in my household will use the well as a source of clean, safe drinking water.
